ABOUT ME

Systems Engineer and Data Analyst with over 6 years of experience in the IT field. Background in banking, journalism, and multimedia projects. Skilled in Python, SQL, Power BI, and web scraping. English level B2+. Goal-driven professional with strong leadership, mentoring, and talent development abilities.

PROFESSIONAL EXPERIENCE

Sr Applications Management Engineer Endava SAS - Sept 2019 - Present

As a Level 3 Support Engineer, I contributed to projects focused on handling critical incidents, performing updates, analyzing requirements, and managing application migrations throughout their lifecycle.

- Project 1: Led support for subscription and data management applications. Built monitoring tools based on ETL processes and automation solutions for user creation, page updates, and test validation.
- Project 2: Managed chatbot migrations across multiple platforms, working closely with clients to define requirements and improve system performance.
- Project 3: Oversaw a banking system for a client, resolving incidents and driving continuous improvements.

Additionally, I served as a mentor for the internship program and later coordinated it, managing content and interview processes. I also supported teammates as a career coach, helping them achieve their professional goals.

Internship Endava SAS - Jan 2019 - Jun 2019

I participated in the internship program, attending technical workshops to improve my skills and solving challenges designed to measure my knowledge. I also collaborated on an internal IoT project, helping with its analysis, development, and tracking.

EDUCATION

Universidad Jorge Tadeo Lozano
